decided that it would be best to establish a girls' school in the new building.

A committee of the Board of the Board of Education reported adversely upon this proposition, and The Evenino World investigated the question. The general sentiment seemed to be that the position of the trustees was the proper one; that the girls should be removed from the school in Forty-fourth street, near Eleventh arenue, to the new building; that the overflow from the girls' grammar school in Forty-seventh street should be accommodated in the same building, and that School No. 51 in Forty-fourth street should be devoted to the use of the boys.

The result of this investigation evidently set the members of the Board of Education to thinking,

for when the report, of the committee was acted on yesterday, it decided by a vote of 15 to 4 that the girls shall have the new building, the boys to content themselves at No. 51.

LABOR LEGISLATION.

The national House of Representatives has passed two more bills intended to operate for the benefit of the working classes.

One of them creates a Department of Labor, with a Commissioner at its head, to examine and report upon industrial questions with a view to acquiring information that will be a guide to legislation. The other bill establishes a National Board of Arbitration, to deal with railroad and other difficulties that have interstate or national relations.

The bills are no doubt well meant, and might do some good. But the greatest service Congress can do the workingmen just now is to relieve them of the burden of superfluous taxation upon their necessities.

PHILANTHROPIST PHELPS.

What a very philanthropic and benevolent individual EDWARD R. PHELPS is—as depicted by himself!

SERVED HIM RIGHT.

- Judge Cowing did a notable public service in sentencing George Ward to State Prison for four years for attempting to blackmail a worthy young woman by threatening to libel her to her lover.

Blackmailing is bad enough when it selects a man as its victim. It is inexpressibly despicable when it assails a woman upon her most vital point-her honor. It is not every girl who would meet the dastardly attempt as Avenue. pluckily as this one did in causing the arrest of the wretch and testifying to secure his punishment.

But in such cases courage is the best policy. To yield an inch to a blackmailer makes an ell necessary.

CLUB ETIQUETTE.

The reported suspension of a Manhattan Club wag for three months for the sportive trick of blacking the hands and striping the face of the redoubtable IRA SHAPER, while that explosive individual was engaged in the process of "sleeping it off," illustrates a funny phase of club etiquette.

A member may get uproariously drunk in some of these institutions, make the air blue with big oaths and kick up a row that would disgrace a respectable barroom and escape discipline if the affair doesn't get into the papers. But a practical joke that simply renders a disgusting object ludicrous touches the dignity of the club in a tender spot.

Great is etiquette.

The Coroner's jury in the PITTMAN case declare the late management of the Tombs to have been ' a disgrace to the city!" And yet Fatty Walsh's respectable backers stand by him. So much for " a pull."

How very careful the Assembly Committee is not to have the investigation of PHELPS broadened an inch in its scope.

could be seen the blue steel of revolvers and the shining blades of murderous knives. Before the night bad passed and had been swallowed up by the morning light five schooners were depleted of all portables of value, the yawl had disappeared, and there was no trace upon the vista of water of the pirates who had performed their nefarious work so silently and successfully.

In going to and returning from this midnight plunder the Slaughter-House Gang had passed and repassed Bedloe's Island, and a black shadow of the cross-beams on which Saul and Howlett paid the dreadful penalty of their crimes fell across their path. It had no terrors for Waddy and his fellow-criminals, however, for they had accomplished their mission without the sacrifice of human life, and they felt that detection could only bring a term of imprisonment, the reward of the risk which they knew was likely to befal

It was a brilliant piece of work, and they felt a comfortable degree of security. A pull of forty minutes brought them to their rendezvous, and after mutual congratulations. frequent libations and a cordial adieu, the gang separated, to await further commands from the Pirate King.

HE WAS ALMOST READY TO SHOOT OUT AND WAS EXAMINING HIS REVOLVER.

The news of the wholesale plunder of the small vessels in the bay was made known early on the following morning, and there was a spirit of uneasiness among the captains and crews of the scores of vessels that rode at anchor in the harbor of the great metropolis. At this time Alexander S. Williams was Captain of the Fourth Precinct, and he spent his days and nights in the Oak street stationhouse. It was unwelcome news to him, for he knew that the river thieves were residents so graceful and charming a way, and the same of his precinct; but how to secure them and prove their guilt was the difficult problem he

had to solve. Capt. Williams sat in his private room in deep thought. He remembered how within ten minutes he had been taken from the ranks, made a roundsman and then promoted to be a sergeant. He recalled the fact that one night he received an order to report forthwith to the residence of a Police Commissioner and was surprised by the interrog-

" How would you like to be a captain ?" Such a thought had never flashed across his mind, for he was a young sergeant and he knew that a score of men were pulling wires for the then vacant captaincy. The interview ended without any assurance that he would draw the much-coveted prize, and he remembered that on the following day by a unanimous vote of the Board he was made a captain, with the only explanation that it was a case of merited preferment. Now his golden opportunity had come and his mind

THE PIRATES MUST BE CAPTURED.

was made up.

These depredations must cease and their authors brought to justice, was his mental determination, but when and how? He paced the floor awaiting the arrival of his trusted detectives, who had been sent on scouting expeditions. His meditations were rudely disturbed by an impetuous rap at his door, and he barely had time to say " Come in" and resume his seat at his table.

The detectives reported that several wellknown river thieves had been seen in the saloons of the precinct on Saturday flush with money, and it was known also that they had been selling clothing 'and other articles Registered at the Union Square Hotel: C. P. Wat-son, of Fort Worth, Tex.: h. B. Burrows of Phila-delphia; Guy H. Carieton, of Boston, and J. W. Mamilton, of Topeka, Kan.

When the bells were ringing out a welcome to Sunday services and throngs of the faithful were wending their way to church, Capt. Williams was casting the net which was to catch the big game he was in search of. He was almost ready to start out, and was examining his revolver when another sharp knock was heard at his door. The visitor this time was the barkeeper in John Robinson's saloon the shine out of any one at No. 9 Elizabeth street. The Captain could scarcely account for his visit, and demanding an explanation, the barkeeper said that Waddy, who had been drinking very freely, entered his saloon and fell asleep on a chair near the window. His coat flew open and from the inside pocket the barkeeper caught a view of a large bundle of papers of uniform size. Prompted by curiosity, he removed them and discovered

that they were bills of lading representing IT WILL KEEP UP ITS LICK.

Caucussing on the Tariff Bill. WASHINGTON, April 19.—The Democratic mem bers of the House met in caucus to-night, 110 memters being present, including Speaker Carlisle and Mr. Randail. The proceedings were confined to exdlowed for the tariff debate. There appeared to be feeling in some quarters that it wo to adopt any cast-iron rule which might operate to deprive the more important committees—such as that on Rivers and Harbors—of the privilege of taking advantage of any intervals in the tariff debate to preas their favorite measures to the point of action. There was, however, no apirt of controversy developed, and a very moderate tone characterized all the speeches on the Subject. It was generally admitted that the Republican minority should be afforded the fullest and freest opportunity to discuss and amend the pending bill, and the caucus closed by adopting the following resolution: adopt any cast-iron rule which might operate

Resolved. That the Democratic members of the Ways and Means Committee be requested to confer with their associates on the committee and endeavor to reach an agreement as to the time during which debate on the tariff bill shall continue.

enactment to put into effect the treaty recently entered into by the United States and Canadian Commissioners at Washington came up for its finareading Monday in the House of Commons. In
opening the debate Hon. David Mills, Liberal, said
that he understood that within twenty-four
hours the Senate of the United States
will have dealt with the treaty by
either rejecting or accepting it, and in view of this
be thought it was impolited on the part of the Dominion Government to force the debate to a conclusion until it was ascertained what the Americans intended doing.

Several of the leasing members on both sides of
the House spoke, the Liberal side, including Sir
litchard Cartwright and Laurier, taking exception
to many details of the freaty, yet agreeing in the
end to accept it in the absence of anything better
the Government had to offer. The bill passed without division. The earch after perfection of style and fit is pursued

search after perfection of style and fit is pursued as closely by the sterner as by the softer sex. A good tailor is a treasure as highly prized for his value as for his scarcity, and a well-dressed man is besieged by his irrends for the name and address of his benefactor.

But first-class work and fabulous prices keep close company, and fabulous prices are often paid for very inferior work. Only by some unusually fortuito as succession of circumstances can custom-made clothes, tying in style and fit with the productions of the most exclusive tailors, be obtained at reas-mable prices. at reasonable prices.

But the problem has been solved for the benefit of the men about town by George A. Castor & Co., the well-known merchant tailors.

By a stroke of rare good luck this enterprising firm has just been enabled to buy up a large and unique stock of fashionable spring suitings belonging to a European house.

Castor & Co. have a force of artist cutters who stand at the head of their profession, and a rare chance is afforded to lovers of good clothes to secure the best custom-made goods and the most styllah fit at, remarkanly low rates. MALTESE CROSSES FOR BLUE COATS.

The Handsome New Decorations for Honerably Mentioned Policemen.

Those policemen who have received honorable mention will soon be presented with new decoretions. The medal originally issued was a small copper decoration, without any beauty, and only cost 90 cents. The men who received them from their Superintend ent's hands felt that the Commissioners might have furnished a medal which presented a creditable appearance, and there was so much talk on the subject that finally it was decided to call in the old medals and it was decided to call in the old medals and issue new decorations of handsome design. Commissioner Voorbis, Supt. Murray and Inspector Steers were appointed a committee to choose a design and superintend the manufacture. They have examined scores of designs, and have decided upon one of which a faithful reproduction is herewith given;

It is a Maltese cross composed of copper, with silver and gold raised ornamentations, and is very handsome. In the centre, on a sunburst, is a regulation wreath inclosing the motto:

> These Prisoners Are in Luck. ISPECIAL TO THE WORLD

CHICAGO, April 19. - In the case of Robert Patter ion, who was sentenced to prison for life under the habitual criminal act, which is based upon the principle that a man convicted of three successive crimes is a confirmed criminal and should be re-strained of his liberty, the Supreme Court holds that the law is unconstitutional. This decision affects half a dozen other prisoners, all of whom must now be released at the expiration of their original sequences.

Constitutional Catarrh.

No single disease has entailed more suffering or has tened the breaking up of the constitution than Catarra. The sense of smell, of taste, of signt, of hearing, the human voice, the mind-one or more, and sometime all—yield to its destructive influence. The poison it dis ributes throughout the system attacks every vital force
and breaks up the most robust of constitutions. Ignored because but little understood, by most physicians, impo-tently assailed by quacks and charlatans, those suffering from it have little hope to be relieved of it this side of the grave. It is time, then, that the popular treatment of this terrible disease by remedies within the reach of all passed into hands at once competent and trustsorthy. The new and hitherto untried method adopted by Dr. Sanford in the preparation of his RADICAL CURE has won the hearty approval of thousands. It is instantaneous in affording relief in all head coids. specing, souffling and obstructed proathing, and rapidly removes the most oppressive symptoms, clearing the head, sweetening the breath, restoring the senses of smell, taste and hearing, and neutralizing the constitutional tendency of the disease towards the lungs, liver and kidneys. SANFORD'S RADICAL CURE consists of one bottle o

the Radical Cure, one box of CATARREAL SOLVENT, and Improved Inhales: price, \$1.

A NERVE MEDICINE WITHOUT MORPHINE OR OPIUM.

A Wonderful Remedy Which Is Purely Vegetable and Harmless.

Some Hints that It is Well for Norvous Pen-ple and Those Who Nuffer from Mecpless-ness. Nervous Weakness and Exhaustion

contain morphine or opium, and it is, therefore, a pleasure to recommend to the public a remedy which does not contain these dangerous drugs nor indeed any article which is injurious. We refer to Dr. Greene's Heavura Nerve Tonio, a wonderful nerve cure, discovered by the famous specialist in nervous diseases, which is to-day the acknowledged leading nervs remedy of the world and the best tonic and restorative in existence. This remarkable remedy is purely vegetable, being pa-pared from health and strength giving plauts, fresh from the bosom of Mother Earth, and is Nature's own

Its strengthening and invigorating effects are wonder-ful. The tired and exhausted brain is invigorated and refreshed under its healthful effects; the weakened and prostrated nerves are vitalized, recuperated and bulk up under its restorative powers; merve force and physical power are re-established, the waning strength is revived and renewed. It nerves the weary arm, strength on the tired limbs, cures the aching head, removes one the tired limbs, curss the aching head, removes nervousness and nervous weakness, banishes all tired sellings, soothes, calms and quiets the excitable and inritable nerves, produces natural and refreshing alsen. times the gloom, depression and despendency from the tind, cures neuralgia, palpitation of the heart, nervous debility, loss of memory, paralysis, numbress, trembles, hot flashes, dyspepsis, indigestion, constipation or the morphine or opium habit, All these things it does by its direct invigorating and

health restoring effects upon the brain, nerves and bedg. No sufferer from any form of nervous disease should healtate to use it. It is guaranteed perfectly harmless and may be given to weak, nervous and restless childres, or to the most delicate invalids with positive assurance f beneficial effects.

While writing the above, your correspondent was

handed a letter just received from a most estimable lady, Mrs. Frances M. Bodle, of Chester, N. Y., who has been most wonderfully benefited by this remedy, She says: "I was miserable, had no ambition, no strength in my limbs, and was tired all the while. When I walked a few rods, I feit as if I would drop down on the ground. I asked the doctor here if he could give ma someting to strengthen me. He told me to get Dr. someting to strengthen me. He told me to get Dr. Greene's Nervura Nerve Tonio, for it is highly recommended. I got this remedy, and it has done me more good than anything I have ever taken. I do not want any other medicine but Dr. Greene's. I look and feel hike another person since I began to take it, and I reommend it to all that are alling."

Mr. Cleveland's Marriage Certificate Brings About a White House Revelation. [SPECIAL TO THE WORLD.] Washington, April 19. —Quite a breeze was created this morning in the Committee on Printing. tective has met with serious obstacles and has developed a great fancy for dropping the lines and clinging to the horse's mane. Sev-eral times he has turned a difficult somer-sault over the head of his steed, but he pluck-ily and good naturedly declares that "he will get there just the same." where an investigation of the methods of the pres ent and former administrations of the Governme Printing Office had been in progress for several weeks. Major Pruden, assistant private secretary

to the President, was put on the stand to tell what he knew about the elaborate binding at the Government bindery of the marriage certificate of the President and Mrs. Cleveland. Chairman Richard-Suit to Recover \$50,000 on a New York

ment bindery of the marriage certificate of the President and Mrs. Cleveland. Chairman Richardson, learning that evidence would be produced in this relation, acquainted the President with the facts and asked his advice as to the best course to be pursued in the matter. The President, who for the first time learned that his certificate of marriage had ever been within the walls of the Government Printing-Office, at once replied:

"Go ahead with your investigation; never mind where it strikes." From the researches of Mr. Richardson it appears that Pruden, who writes a fine Italian hand, engrossed a copy of the marriage certificate of ine President and, after securing the signatures of Rev. Dr. Sunderland, who performed the ceremony, and the members of the Cabinet who winessed it, took it to the printing office and requested Mr. Rounds turned it over to his most skilful workmen, who succeeded in producing a traing of beauty and a joy forever, with the aid of several skins of motocco and an abundance of gold leaf. This was returned to Mr. Pruden, who presented it to the President with his compliments. The President, supposing it to be a token of kindly esteem from his assistant private secretary, accepted it with thanks.

Mr. Pruden testined to-day that it had been customary to have private work for the President done at the Government Printing Office during past administrations, but that when President Cleveland discontinued.

Mr. White, foreman of the bindery, testified that interested of printing of free-will offering of Mr. Pruden leating of Mr. Pruden partices.

Mr. white, foreman of the bindery, testified that instead of being a free-will offering of Mr. Prudea, it cost Uncle Sam \$8 or \$10. The President smile at the whole affair, but Mr. Pruden is very sorry that he did not take the certificate to a private bindery, for his fellow-clerks at the White Housare likely to make his life a burden for some time

"The Right of Way." A private press view of Mrs. Lakey's great pic-ture, "The Right of Way," will be given at Mc. 86 Fifth avenue this afternoon. This is the notable canvas that has recently been on exhibition in London at Goupil's, and about which so much has been cabled to this country. Mrs. Lakey is a pupil of You Marke, and her vigorous drawing and coloring of the study cattle are as masculine in treatment as those of Roas Bonheur herself. The canvas is so immense that the cattle at first seem almest life-size. The artist was at work on it for three years.
